# PHP Programming Cookbook

# Contents

**1 PHP Tutorial for Beginners** **1**
1.1 Introduction . . . 1
1.1.1 Where is PHP used? . . . 1
1.1.2 Why PHP? . . . 2
1.2 XAMPP Setup . . . 3
1.3 PHP Language Basics . . . 5
1.3.1 Escaping to PHP . . . 5
1.3.2 Commenting PHP . . . 5
1.3.3 Hello World . . . 6
1.3.4 Variables in PHP . . . 6
1.3.5 Conditional Statements in PHP . . . 7
1.3.6 Loops in PHP . . . 8
1.4 PHP Arrays . . . 10
1.5 PHP Functions . . . 12
1.6 Connecting to a Database . . . 14
1.6.1 Connecting to MySQL Databases . . . 14
1.6.2 Connecting to MySQLi Databases (Procedurial) . . . 14
1.6.3 Connecting to MySQLi databases (Object-Oriented) . . . 15
1.6.4 Connecting to PDO Databases . . . 15
1.7 PHP Form Handling . . . 15
1.8 PHP Include & Require Statements . . . 17
1.9 Object Oriented Concepts . . . 19
1.9.1 PHP Classes . . . 20
1.9.2 PHP Constructor Function . . . 20
1.10 Conclusion . . . 21
1.11 Download the source code . . . 21

**2 Upload Script Example** **22**
2.1 Preparing the environment . . . 22
2.1.1 Installation . . . 22
2.1.2 PHP configuration . . . 22
2.2 Upload form . . . 23
2.2.1 Accepting only certain type of files . . . 23
2.3 PHP upload script . . . 24
2.3.1 A secure file upload script . . . 24
2.3.2 Considerations . . . 27
2.4 Summary . . . 27
2.5 Download the source code . . . 27

**3 Mail Function Example** **28**
3.1 Preparing the environment . . . 28
3.1.1 Installation . . . 28
3.1.2 sSMTP configuration . . . 29
3.1.3 PHP configuration . . . 29
3.2 PHP mail sending script . . . 29
3.2.1 Setting additional headers . . . 30
3.2.2 Setting additional parameters . . . 30
3.3 Troubleshooting . . . 31
3.3.1 Set verbose mode . . . 31
3.3.2 Login is rejected by SMTP server . . . 31
3.3.3 Firewall is filtering outgoing traffic . . . 31
3.3.4 Check PHP error log . . . 31
3.4 Alternatives to sSMTP . . . 31
3.5 Summary . . . 32
3.6 Download the source code . . . 32

**4 Date Format Example** **33**
4.1 Preparing the environment . . . 33
4.1.1 Installation . . . 33
4.2 How should dates be stored? . . . 33
4.3 PHP examples . . . 34
4.3.1 From time stamp to human-readable . . . 34
4.3.2 From human-readable to time stamp . . . 34
4.3.3 DateTime class . . . 35
4.3.4 Increasing precision . . . 35
4.3.5 Validating user introduced date . . . 36
4.4 Summary . . . 37
4.5 Download the source code . . . 37

**5 SoapClient Example** **38**
5.1 Preparing the environment . . . 38
5.1.1 Installation . . . 38
5.1.2 PHP configuration . . . 38
5.2 What is SOAP? . . . 39
5.3 PHP example of SOAP clients . . . 39
5.3.1 Working directory structure . . . 39
5.3.2 The server . . . 40
5.3.3 The client . . . 40
5.3.4 Using the client . . . 42
5.4 Considerations . . . 44
5.5 Summary . . . 44
5.6 Download the source code . . . 44

**6 Login Form Example** **45**
6.1 Preparing the environment . . . 45
6.1.1 Installation . . . 45
6.1.2 PHP configuration . . . 45
6.2 How should passwords be stored? . . . 45
6.2.1 Worse: plain text . . . 46
6.2.2 Not bad: password hashing . . . 46
6.2.3 Better: password hashing + salting . . . 46
6.2.4 Even better: Key Derivation Functions . . . 46
6.3 Creating users . . . 47
6.4 Login . . . 48
6.4.1 Form . . . 48
6.4.2 Form handling . . . 48
6.4.3 Login against database . . . 49
6.5 Summary . . . 52
6.6 Download the source code . . . 52

**7 Curl Get/Post Example** **53**
7.1 Preparing the environment . . . 53
7.1.1 Installation . . . 53
7.1.2 PHP configuration . . . 53
7.2 GET requests . . . 53
7.3 POST requests . . . 55
7.4 Encapsulating operations in a cURL class . . . 56
7.5 Summary . . . 59
7.6 Download the source code . . . 59
